

Ski Spectacular Instructor Academy Hosted by The Hartford Ski Spectacular December 9-12, 2024 Clinic Summary Notes

Clinic Topic: Blind Guiding Basics – Entry Portal, Teresa Day, mothert@oneimage.com

- 1. Assessments should be done both inside and outside due to different lighting conditions. Adaptive Alpine Teaching Manual pages 19-31 general, pages 69-72 vision specific.
- 2. Learn about different diagnoses. The more you know the more appropriate your assessments will be. Adaptive Alpine Teaching Manual page 68, Adaptive Instruction Supplement pages 66-70.
- 3. Teaching aids and guiding systems are two very different entities.
 - a. Teaching aids such as ski tip clips, bamboo poles, and tethers, are used to help the student achieve a specific outcome and then removed.
 - b. Guiding techniques such as voice, pole clicking, hand-in-hand are used to help the guest safely navigate on and off the hill.
- 4. Review and practice all techniques on-hill until comfortable using them.
- 5. Safety is paramount:
 - a. If your student has sight take advantage of it. Use vests that they can see. Stay in their field of vision.
 - b. The instructor is responsible for the safety of themselves and their guest.
 - c. Speed control is through turn shape not an instructor's wedge.
